openABEKT

An Integrated service for catalogue & library functions

User-friendly & reliable cataloguing for all users

openABEKT Catalogue enables you to work effectively, even if you are not experienced cataloguers.

openABEKT offers ready-made standardized authorities and records, so that you develop your catalogue even faster. There are Basic Forms for all users and MarcEditor, a dynamic tool for experienced cataloguers. Last edition of UNIMARC is fully incorporated into openABEKT while the platform allows dynamic updates. openABEKT allows you to fully manage digital files of various formats, while offers safeguards to avoid duplication, errors and information loss.

A dynamic experience of content discovery

The Discovery environment offers a dynamic experience of searching and using your open, public access catalogue.

Your catalogue is open and visible, navigation is intuitive, browsing and searching are done flexibly, in all records and metadata fields, while faceted search offers a dynamic discovery experience to your users. All or selected records and digital files can be presented open to your public if you so wish. Semantic links between resource records and authorities are being showed in a new upgraded context. Metrics and statistics offer a whole new picture of your content at a glance.

Updated and effective workflows & functions

openABEKT Workflows & Functions allows you to manage Holdings, Patrons, Circulation, Statistics and Reports easily and effectively.

Circulation control takes place quickly and flexibly. New functions, such as personalized recommendations and updates, facilitate Patrons services. Patrons can now view their profile, history and available services online. Workflows & Functions allow inter-library loans and produce automated reports and stats for Patrons, Circulation and Holdings.

A cloud-based service.
Easy to use & sustainable.

openABEKT is being offered as an Integrated Software as a Service (Saas) hosted, maintained and secured by EKT's Cloud Infrastructure, so there is no need for software installation.

It is perfect for libraries and other content-rich organizations with complex needs for managing content, users, members and multiple workflows

cloud based   online   user-friendly   sustainable

openABEKT allows you to have
